RE: RESIDENTIAL STRUCTURAL ENGINEERING PRICE GUIDE

Structural Engineering

Below are the **approximate** engineering prices for residential engineering design, documentation, and design certification. The indicated prices may vary up or down depending on the complexity of the project and does not include GST.

Item	Description	Price (AUD)
1	New – Single Storey House	\$1250.00
2	New – Double Storey House	\$1950.00
3	New – Duplex Single Storey House	\$1750.00
4	New – Duplex Double Storey House	\$2550.00
5	Granny Flat	\$500.00
6	Alterations & Additions	\$1250.00
7	Retaining Walls	\$500.00
8	RPEQ Certification	\$500.00
9	Hydraulic, Stormwater and Drainage Design	\$900.00

For item 1 to 5, wall & roof framing, bracings and tie downs assumed by timber truss manufacturer.

Site Inspections

Inspections during construction are in addition to the engineering design fee. Our inspection fee around metropolitan area is \$300+GST, and is based on \$150/hr + \$0.65/km.

Inspection are necessary and will be carried out by a qualified civil/structural engineer either through us or through your certifier on request at the following stages:

- (1) at completion of trench excavation and prior to placing of waterproof membrane.
- (2) on completion of reinforcement placement, formworks and prior to concreting.
- (3) on completion of framing, bracing and tie-down, and this should be done prior to lining the walls.

Required for Quoting

We will require architectural drawings in AutoCAD format such as .dxf or .dwg format. Please note that no drawings provided may end up costing more in the long run due to additional work for us to develop engineering drawings in AutoCAD from scratch.

Yours Faithfully,

AMC Engineering Consultants
